

Kirkfield Curb Appeal

Task(s): Minimize the effect of the obstruction of the view of the house. Increase the curb appeal.

Date: 2010

Budget: \$ 5000

Notes:

- The original curb appeal is not inviting as the view of the house is obstructed by spruce and window awning.
- We took off the awning to increase the visibility and realized that the huge window was rotten. We had to install a new one and pressure washed the stains on the siding.
- We dug up and disposed of the cedars around the window. We planted annuals and perennials into the unused flower box.
- We trimmed the huge spruce to increase the house visibility. To fix the dead grass that we often see around a spruce, we created a flower garden.
