

## Egyptian Living Room

**Task(s):** Make the living room feel warmer and more comfortable.

**Date:** 2014

**Budget:** \$ 300

**Notes:**

- The original space felt cold and had too many chairs. It looked disorganize and messy.
- We started off by painting two walls in a rich olive green. On the remaining walls we installed a beige linen/cotton textured wallpaper that instantly gave the room a warm and welcoming feeling. The earthy colour scheme invites people to relax and socialize.
- Two nice plants in rope containers give symmetry around the taupe faux suede couch, to give the room a stronger focal point.
- The dark brown wood crate can either calm the puppy or be used as a side table for drinks.
